

Urban Forest Innovative Solutions Signs Exclusive Distribution Agreement to bring Dutch Elm Disease Bio-Vaccine to Canada.

Toronto, Nov 15 2008 - Urban Forest Innovative Solutions (UFIS) announced the signing of an agreement with Tree Care Innovations LLC to be the exclusive Canadian distributor for Dutch Trig®, a proven bio-control vaccine against Dutch elm disease (DED).

UFIS, in partnership with its sister company Urban Forest Innovations (UFI) has been providing urban forestry and arboriculture expertise in Canada for over 20 years. "I am very impressed with the efficacy of Dutch Trig® in both Europe and the United States," said Philip van Wassenaeer, President and Chief Consulting Arborist of UFIS. "And the fact that the vaccine is a non-chemical micro injection translates into a safe and quick preventative treatment for elm trees at risk from DED. We are very excited to be selected by Tree Care Innovations to represent and support Dutch Trig® in Canada."

Presently under review with Health Canada's Pest Management Regulatory Agency (PMRA), Dutch Trig® will soon be available in Canada to help prevent and control the Dutch elm disease threat facing many Canadian urban forests.

About Urban Forest Innovative Solutions

Founded in 2008 Urban Forest Innovative Solutions (UFIS) was created to support new treatments and methods of assessment to help preserve, enhance and manage our valuable urban forests. UFIS has partnered with leading manufacturers from around the globe to bring the most successful and safest tree care technology to Canada and the United States.
